

# Powiślański University

with headquarters in

- Kwidzyn
- Gdańsk
- Toruń
- Kościerzyna

I ♥ PSW

*We are for the student!*

[www.psw.kwidzyn.edu.pl](http://www.psw.kwidzyn.edu.pl)  
[www.powislanska.edu.pl](http://www.powislanska.edu.pl)

Powiślański University was established in 1999 as a non-state HEI, registered under number 166 in the Register of Non-Public Higher Education Institutions (formerly: Register of Non-Public Higher Education Institutions and Associations of Non-Public Higher Education Institutions), kept by the Minister of Science and Higher Education.

Powiślański University is a non-profit organization. Its founder is the Society for Economic and Environmental Education in Kwidzyn, represented by people who are professionally involved in various forms of education and whose passion is the continuous improvement of educational methods and results. Reliable education of students is a priority for us, therefore we take special care when selecting lecturers, taking into account their knowledge, qualifications, experience and skills.

Powiślański University, constantly facing the changing market realities, including the widely understood labour market, is realizing its main vision „CHOOSE THE PROFESSION OF TOMORROW!” and of course constantly improving the quality of education, focuses on development. Development in the sense of constantly expanding educational offer, corresponding to the needs of regional and local employers, with whom it cooperates on an ongoing basis within the Powiślański University Employers Council, but also development in the context of improving and modernizing didactic and research-didactic base. In this regard, the University has launched the Powiślański Monoprofile Center of Medical Simulations for the Faculty of Health Sciences, which has a number of specialized laboratories, computer laboratories, including those with full facilities for disabled students.

However, to meet the needs of students, listening to their voices very carefully, because „WE ARE FOR THE STUDENT” - in our performance is not an advertising slogan, but real actions, the University implements a number of educational, but also developmental projects, in the context of developing branches of the University, so as to facilitate studying. Thus, it is implementing territorial expansion - branches in Gdansk, Torun and Koscierzyna are in the country, it is also trying to establish branches abroad and also new educational programs.

The student's education and their practical skills are a priority for the University, therefore we take special care in selecting the research and teaching staff taking into account their knowledge, qualifications, experience and skills.

At our University, the high level of classes is guaranteed by 122 teaching staff members, including 5 professors, 44 doctors, 73 master's degree holders. The staff of Powiślański University consists of high-class specialists with established scientific authority and rich practical knowledge. They are persons with significant scientific achievements, recognized in the country and abroad.

The basis for staff selection is a positive assessment of the compatibility of the teaching, research and teaching profile with the field and discipline of science, and thus with the directions of education at PSW. The staff is also based on experienced PRACTITIONERS, specialists in their fields, including high-level managers from the field of ECONOMY, chief nurses and directors of nursing from leading units of the health care system in the region for the specialization in NURSING, heads of emergency wards and specialized paramedics in the field of EMERGENCY MEDICINE, professionally active recognized specialists in the field of COSMETOLOGY and DIETETICS, respected and valued midwives for the specialization in MIDWIFERY, and other practitioners with extensive professional experience, confirmed by successes, whose professional careers clearly demonstrate the knowledge they possess.

### *Institute of Science and Development*

For the purpose of staff development, the University has established the Institute of Science and Development

The Institute organizes, supports and supervises the process of obtaining scientific titles for teaching and research staff of the University. The mission of the Institute is to support the education of its own research and development staff by means of obtaining doctoral, post-doctoral and professorial titles by teachers. The Institute, taking advantage of the huge scientific potential and professional experience of its academic staff, is tasked with undertaking research and development projects whose effects and outcomes will have a beneficial and effective impact on the socio-economic environment. The Institute also plays the role of an expert and advisory body for external entities interested in obtaining professional substantive and opinion-forming help with regard to problems encountered in the functioning of enterprises or institutions, and questionable issues in the field of economy and health care. The Institute is also involved in obtaining international accreditations for its fields of study. By organizing scientific conferences, taking part in student scientific circles' meetings and through publishing activity, the Institute promotes knowledge at the highest level, enabling the lecturers, students and our supporters to gain still developing knowledge in the field of economics, nursing, midwifery, emergency medicine, psychology, forensic science, cosmetology, dietetics and others, related to the conducted fields of study.

Taking into account the needs of the labor market, we offer the following programmes::

## **FACULTY OF ECONOMIC AND SOCIAL SCIENCES**

### **BACHELOR STUDIES**

#### **ECONOMICS**

##### **specialties:**

- managerial economics
- economics of service and production processes
- transport / forwarding / logistics
- finance / banking / accounting
- computer science (Applied Computer Science)
- HR (human resources management)
- Agroeconomics

#### **ECONOMICS (English division)**

##### **specializations:**

- finance / banking / accounting\*
- economics of health care

### **MASTER STUDIES**

#### **ECONOMICS (English division)**

##### **specialties:**

- finance and accounting
- human resources management
- transportation economics
- health care economics

## **FACULTY OF HEALTH SCIENCES**

### **BACHELOR STUDIES**

#### **NURSING**

#### **NURSING – BRIDGE STUDIES POSTGRADUATE STUDIES**

#### **EMERGENCY MEDICINE**

#### **COSMETOLOGY**

#### **DIETETICS**

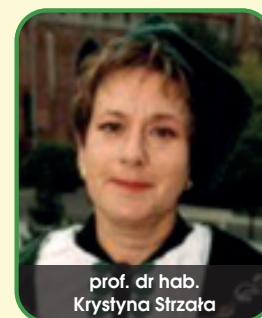

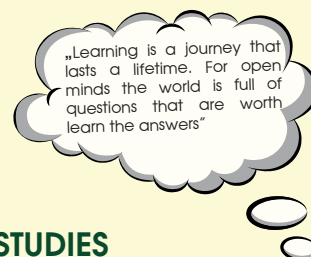

#### **MIDWIFERY**

### **MASTER STUDIES**

#### **NURSING**

### **COMPREHENSIVE MASTER DEGREE\***

#### **MEDICINE**

prof. dr hab.  
Krystyna Strzala

### Postgraduate education

**specialization and qualification courses as well as specialization training**  
(as part of the Medical Staff Education Centre in cooperation with the District Chamber of Nurses and Midwives in Gdańsk)

### training / courses / workshops

- managers
- teachers
- clerks
- medical personnel
- and for anyone who wants to improve their professional skill

Okręgowa Izba  
Pielęgniarek i Położnych  
w Gdańsku

### MBA- Master of Business Administration

- MBA for nurses and midwives
- MBA for managers of nurseries and children's clubs
- MBA Executive Master of Business Administration

Each year, Powiślański University offers a wide variety of postgraduate studies / courses / trainings and other forms of postgraduate education for people who want to improve their professional qualifications. Students and listeners deepen and update their knowledge in a chosen field, or give themselves a chance to change the industry in which they currently work, by gaining new skills. Classes are taught by lecturers who are experienced experts in many fields. Colleagues from the university will represent various industries, and their experience and joint work on projects will perfectly complement the knowledge and practical skills that everyone will gain and successfully apply in the future. Most of the classes consist of workshops, business games, simulations, practical classes (also at the University's strategic partners) during which students exchange experiences not only with the lecturers, but also with other students. Specific examples and case studies are discussed during the classes, and the knowledge gained can be applied in professional work on an ongoing basis.

Find us here: [psw.kwidzyn.edu.pl/studia-podyplomowe](http://psw.kwidzyn.edu.pl/studia-podyplomowe)

*Don't freak out. Just study.*

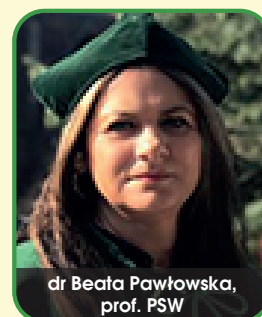

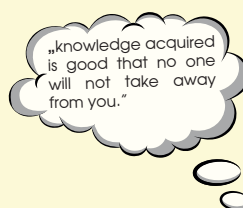

#comestudywithPSW

We know that many of our students work, have families, responsibilities or absorbing hobbies. That is why we design our curricula and study plans in a way that guarantees not only acquiring the necessary knowledge and skills, but also makes it possible to reconcile studies with private life.

## *Theoretical education*

Theoretical education at Powiślański University is based on modern and constantly upgraded didactic base, including specialist laboratories for nursing / paramedics / cosmetology / dietetics / midwifery, criminology, as well as computer laboratories for economics / IT and specialist rooms for psychology. For the purposes of didactics at the Faculty of Health Sciences, the Powiślański Monoprofile Center of Medical Simulations was also established. The following forms of education are implemented in the various fields of study:

- Lectures
- Classes
- Seminars
- Classes without participation of an academic teacher (BUNA) - self-study
- Practical classes
- Professional practice
- E-learning / remote classes

For the purposes of theoretical education - mainly lectures, the Powiślański University's Distance Learning Platform is used. E-learning is a form of supplementing the knowledge by the students. For this purpose, Powiślański University uses the Moodle educational platform, which is directly connected to the Virtual Dean's Office, i.e. the university's student service system and the PSW Remote Learning Platform based on the MTeams365 streaming platform. This is a convenient way to support traditional forms of education. The advantage of remote classes is the possibility to learn outside the traditional didactic base. Students can access materials at any time and place. E-learning enables the demand for self-study, but it also supports students, as part of long life learning. This form of education also provides greater efficiency due to the attractiveness of the information contained in the training. It can be presentations, visualizations, quizzes, tests and other resources that the lecturer wants to provide to his students.

## *Practical classes*

When organizing practical classes and student internships, we are guided by the principle that the internship must help the student prepare to work in the job market, so that he or she has adequate experience, can determine their place in the competitive job market, and help choose their own path of development. Currently, more than 100 major employers cooperate with the University.

The primary objective of practical training is to systematize and consolidate the knowledge acquired during the didactic classes at the University and to achieve the assumed learning outcomes in terms of knowledge, skills and social competence. During practical training, the student participates in the current work at the chosen employer and masters the required practical skills, which are acquired under the supervision and guidance of the Supervisor of Practical Training. The student shall be required to complete and pass with a passing grade the required knowledge, practical skills and social competences. The course of practical training is documented and monitored on an ongoing basis.

### DOUBLE DIPLOMA Program at Powiślański University

It allows to obtain a diploma in one field of study at two universities simultaneously.

The classes are conducted in English by suitably qualified teaching staff.

A prerequisite for the award of the double degree is the completion of required courses at the home institution and at the partner institution as well as the preparation of one undergraduate dissertation, defended at both institutions.

The Double Diploma Programme guarantees the acquisition of new skills in an international environment and enables to increase competitiveness on the job market. Moreover, it ensures the development of cultural cooperation, promotion of student mobility and exchange of ideas and professional experience.

What do you gain by studying at Powiślański University?

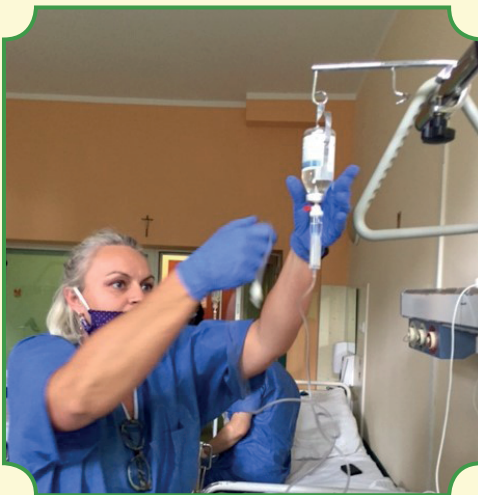

-  practical knowledge - our curriculum will help you start your professional career
-  friendly organization of classes - you can combine studies with work and private life
-  time for yourself - most student issues will be handled online
-  rich student life - join our community
-  a diploma of a university valued by employers

The University provides internships in a variety of institutions and enterprises in accordance with the chosen field of study, e.g. for the nursing major in medical institutions of primary health care, in-patient treatment and specialized departments, as well as in teaching and educational institutions. The selection of institutions for the realization of practical training is based on criteria determined by the University, taking into account the achievement of learning outcomes.

Practical vocational training organized outside the structure of the University takes place on the basis of an agreement concluded between the University and the entity providing practical training. Practical classes are realized by students according to their own preferences - in terms of location and date of realization. Professional practice may be carried out by the student at the time and place indicated by him.

**The above forms allow to achieve the learning outcomes in the field of knowledge, skills and social competence and are a guarantee that the student will achieve the assumed graduate profile.**

Powiślański University undertakes a number of actions to enable as many people as possible to study. The scholarship system, among others, serves this purpose. Students who are in a difficult financial situation receive **social scholarships, financial aid, and students who achieve high results in their studies, in sports and artistically talented - Rector's scholarship.**

**Special privileges are directed towards disabled persons.**

Social grant and scholarship for disabled students are granted for the whole period of studies, also in the first year, whereas scholarship for learning or sporting achievements is granted from the second year of studies.

During the last academic year the University Scholarship Committee had about PLN 620,000 at its disposal. It should be emphasized that each student who met the formal requirements benefited from the scholarship. The average monthly amount of the Rector's scholarship is about PLN 550, social scholarship and scholarship for disabled students is PLN 520. The University also grants one-time support in case of random events in the amount of up to PLN 5,000.

### Scholarships disbursed in the academic year 2019/2020

All	Rector's	Special	Social	Aids
534.450 PLN	208.500 PLN	81.700 PLN	168.800 PLN	75.450 PLN

Details in the educational offer: [psw.kwidzyn.edu.pl](http://psw.kwidzyn.edu.pl)

Powiślański University is active in the area of institutional cooperation on many levels, by organizing events, meetings, volunteers or charity actions. Its activities could not be so effective, if not for our strategic partners, who actively participate in their preparation as well as take part in them themselves. The number of strategic partners for the University, as well as for individual courses, is constantly growing and currently amounts to over 150 institutions / companies and organizations in the country.

We decided that it is worth to present some of them:

### **RIGP**

Regional Chamber of Commerce of Pomerania was established to combine the business opportunities region with the needs of the market. It is a partner in building strong businesses, active local government and modern science.

REGIONALNA  
IZBA  
GOSPODARCZA  
POMORZA

### **ASPHER**

Association of Schools of Public Health in the European Region (ASPHER) is a key independent European organization whose aims to strengthen the role of public health by improving the education and training of public health professionals in both practice and research.

### **Lacroix Electronics Kwidzyn**

„The company, which has been designing and manufacturing industrial products for over 30 years, is one of the organizers of internships for our students.”

### **Kwidzyn City Hall and Kwidzyn County Office**

„Our long-term Strategic Partners, who have been with us since the beginning of our activity, actively help us to achieve the goals of the University and care about its good name.”

**Kwidzyn**  
*Moje Miasto*

### **The County Office in Kościerzyna**

„Our relatively new Strategic Partner, without which we would not be able to open a branch of Powiślański University in Kościerzyna.”

POWIATKOŚCIERSKI  
SERCE KASZUB

### **Medical Entity Copernicus in Gdansk, Kociewskie Centrum Zdrowia in Starogard Gdanski and Specialist Hospital in Kosciierzyna**

„Strategic Partners actively participating in the life of Our University as a place of practice for our students, but also in the organization of various events.”

### **The Regional Chamber of Nurses and Midwives in Gdansk**

„A Strategic Partner who strongly supports our goal of strengthening the profile of nurses and nurse practitioners, reducing the problem of the shortage of medical staff in Poland.”

**Okręgowa Izba  
Pielęgniarek i Położnych  
w Gdańsku**

### **Pracodawcy Pomorza**

„Employers of Pomerania” is the largest and oldest organization of employers operating in the area of the Pomeranian province.

**Pracodawcy  
Pomorza**

### **Kwidzyn Industrial-Technology Park**

„Strategic Partner for many years involved in the organization of most international conferences, students’ conferences and other events of Powiślański University.”

**KWIDZYŃSKI PARK  
PRZEMYSŁOWO-TECHNOLOGICZNY**

### **Medchart**

MEDchart is a technology company, whose goal is to accompany medical personnel medical staff in their daily struggles with excessive bureaucracy, complicated regulations and a constant lack of time. They have created and are improving an application for medical offices medical offices.

### **New Jantar**

„New Jantar” is a health-promoting project including health and training holidays with cleansing diets, detection of food intolerances and with healing fasts.

[www.powislanska.edu.pl](http://www.powislanska.edu.pl)

[www.psw.kwidzyn.edu.pl](http://www.psw.kwidzyn.edu.pl)

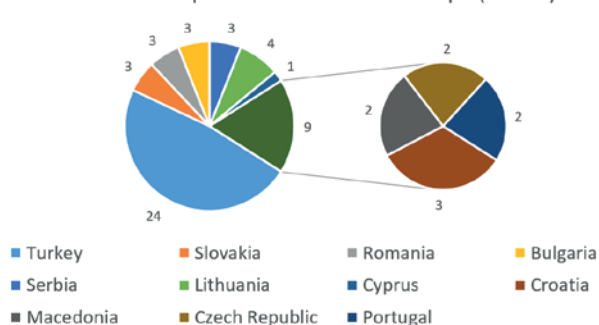

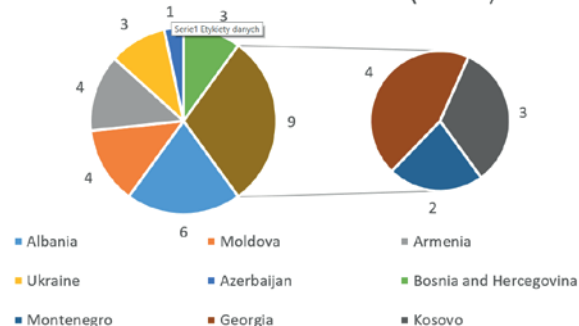

International cooperation is one of the priorities of PSW activity. Cooperation with foreign universities and partner institutions under the Erasmus + programme provides our students with the opportunity to develop under the guidance of international authorities, both during study and internship mobilities.

Albania, Algeria, Argentina, Armenia, Azerbaijan, Bangladesh, Bosnia and Hercegovina, Bulgaria, Colombia, Croatia, Cyprus, Czech Republic, Georgia, India, Indonesia, Iran, Iraq, Italy, Jordan, Kazakhstan, Kosovo, Kyrgystan, Lebanon, Libya, Lithuania, Macedonia, Malaysia, Moldova, Mongolia, Montenegro, Morocco, Palestine, Panama, Philippines, Portugal, Romania, Serbia, Slovakia, Spain, Syria, Tajikistan, Thailand, Tunisia, Turkey, Uganda, Ukraine, Uzbekistan, Vietnam

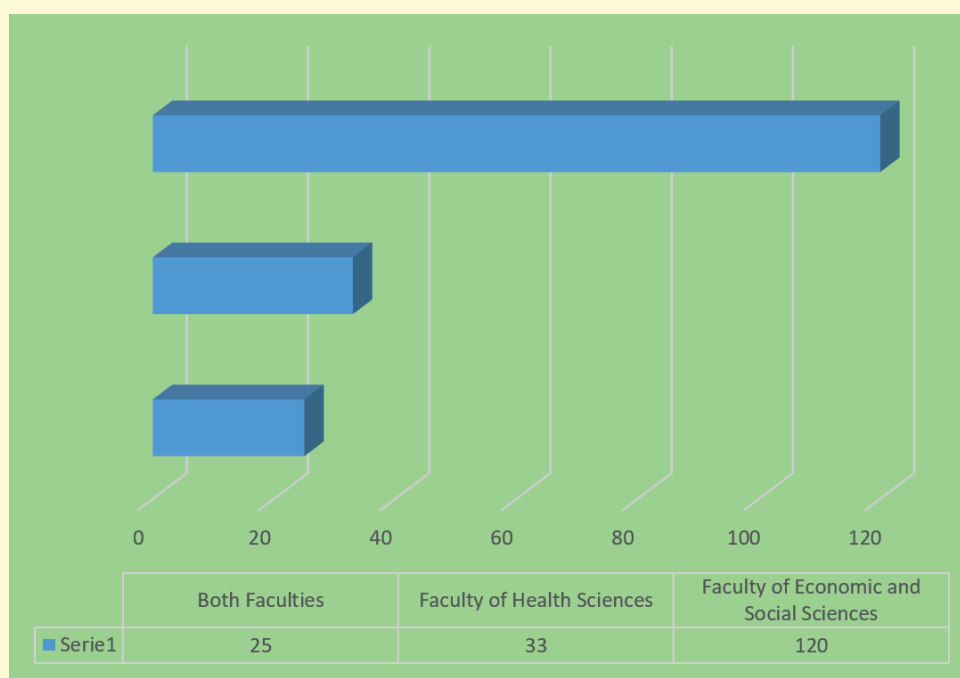

Number of partner universities - Europe (KA131)

Partners from Partner Countries (KA171)

International cooperation PSW brings together 153 higher education institutions from 48 countries, 5 continents.

Number of signed inter-institutional agreements per Faculty.

### Possibilities of the Erasmus + programme at Powiślański University:

- funding for study/traineeship abroad - 48 countries to choose from\*
- participation in international events - Student Conferences, Erasmus + Week
- gaining professional and cultural experience in the international arena

\*after prior notification of willingness to go and contact the partner university

„No matter where you're from, what you do or how old you are,  
it's never too late to discover what Erasmus+ could mean for you”

~ dr Katarzyna Strzała - Osuch, prof. PSW

Powiślański University is the only higher education institution in the region, which educates students in practical courses that enable them to take up a job in their dream profession.

We are for the student

We have the best teaching, research and didactic staff from all over Poland

We value comfort of learning, therefore classes are held in small groups

We focus on the quality of education and individual approach to the student

A student is not just another album number for us

We are a friendly university - we support, help and advise

### Join the academic community of Powiślański University

Student support in the process of learning is comprehensive, takes various forms, adequate to the effects of learning, takes into account the diverse needs of students, promotes social and professional development of students by ensuring the availability of academic teachers, assistance in the process of learning and achievement of learning outcomes, and preparation to conduct professional activity in the areas of the professional labor market appropriate for the faculty, motivates students to achieve very good learning results, as well as provides competent assistance to administrative staff in solving student matters.

Both students and graduates of Powiślański University actively participate in its development, including the activities that the University carries out, but also take an active part in relation to their professional potential. In addition to participation in various societies, associations, conferences they take positions at managerial levels both in the country and abroad. Moreover, they are laureates of competitions, olympiads, contests as well as people recognized for their undertakings not only nationally but also internationally.

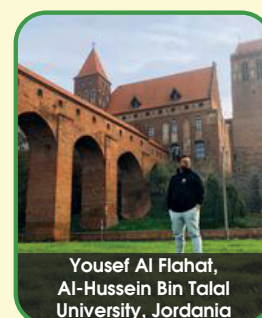

Graduates of the course are described by employers as people who conscientiously perform their duties, are empathetic and have a professional approach to work and customers / patients. Among others, such attitude characterized the graduate Sebastian Jankiewicz, who as a result of the competition became the youngest hospital director in Poland (NZOZ in Radziejów). In the plebiscite of Dziennik Bałtycki Hippocrates Pomerania 2019 in the category Nurse/Nurse Practitioner/Midwife of the Year among the distinguished were the graduate of nursing of the first degree and the student of the first year of the master's degree in Nursing: Ms. Maja Gwóźdź.

Students have the opportunity to participate in student research clubs. There are currently four study circles at the university:

- Leader
- Ecologist
- Nurs-Med
- Statistician

Students actively participate in many "party" cycle events organized at the University:

- First-Year Students' Event
- Students' Days - Kwidynalia in Kwidzyn
- Santa Claus Hats Day
- St. Nicholas' Day
- Children's Day
- Student Christmas Eve
- camping and integration weekends

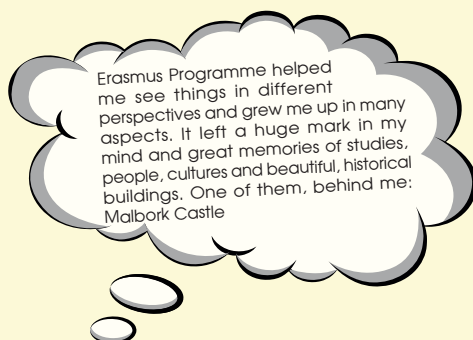

Students are involved in many volunteer initiatives, such as:

- WOŚP in Powiślański
- Noble Parcel
- collections for "little friends"
- collections for the needy, e.g. hospice
- volunteering in health care units
- action StrongerTogether!
- action "Coffee and cake for a medic"

and many... many others...

join #academicsocietypsw

Powiślański University enters into numerous agreements, contracts of cooperation with institutions of higher education environment, as well as joins various associations in order to improve the quality of education, including practical training in the fields of study, as well as to implement and constantly expand the activities related to the third mission of the university, and to engage in solving local and regional social problems.

We are proud to belong to organizations such as:

**MedSilesia Cluster** - The mission of the Cluster is to create a link that will provide an effective platform for cooperation - dialogue between enterprises, R&D units and effective use and combination of their potentials, in order to implement innovative solutions and technologies and transfer and absorption of knowledge. It is one of 13 strategic clusters in Poland.

**Eastern ICT Cluster** – another of the 13 strategic clusters in Poland. Its objectives are the integration and development of business environment, cooperation of enterprises, schools and scientific units, cooperation of local governments, development of all types of cooperation and promotion of cluster activities.

**NutriBioMed Cluster** – The main idea behind the establishment of the cluster was to build a Poland's strong position in the industry offering dietary supplements, nutraceuticals and biomedical preparations, as well as using native, natural raw materials for their production and modern technology.

**Conference of Rectors of Vocational Schools in Poland „KRZASP”** – It deals with the integration of the academic community in Poland, supports activities for the creation of the European area of higher education, represents the community of professional HEIs towards public authorities and supports activities aimed at improving the didactic process.

**Agreement of Organizers of Science Festivals in Poland „POFN”** – the purpose of the agreement is, among others: the integration of the environment dealing with the popularization of science and the organization of festivals and other events related to social responsibility of science.

**Association of Nursing Managers** – Association dealing among others with: organization and management of nursing and midwifery care in health care institutions, introduction of Quality Management Systems and accreditation and promoting activities to improve social health.

### **Anti-discrimination standard / social responsibility of the University**

Guided by the belief in inalienable and indivisible human rights, which are universal in nature and apply to all persons, while being an effective tool for building civil society and creating an innovative and socially responsible University.

Powiślański University effectively counteracts discrimination and violence, including violence motivated by prejudice, emphasizing that violence, unequal treatment and discrimination on any grounds impede or prevent the realization of individual and social potential, constituting a barrier to access to full participation in academic life and preparation for entry into the labor market.

As the whole academic community of Powiślański University we declare that we respect Polish regulations protecting human rights against discrimination and violence and we strive to implement the highest standards aimed at ensuring equal treatment.

Social responsibility and sustainable development are currently important concepts that organize social and economic life. As an important educational center in Poland, we want to implement and show how to carry out socially responsible activities in practice, serving sustainable development. We understand social responsibility as taking responsibility for your own decisions and their impact on society and the environment. We are responsible for the quality of education of future personnel. We meet the needs of economic practice, we adjust the curricula to the needs of the labour market.

Powiślański University is proud of the document - the Declaration of Social Responsibility of Universities, which is a voluntary commitment of universities to promote the idea of sustainable development and social responsibility in educational programs, scientific research, as well as management and organizational solutions of universities.

The aim of the Declaration is to build broad social awareness of the role of HEIs in creating conditions for sustainable socio-economic development of the country.

## Powiślański Monoprofile Medical Simulation Center

Direct Benefits to Students:

- Training for nursing students in NW, PW, SWW simulation
- Training for nursing students on the OSCE exam method
- Simulation workshops
- Expansion of the PSW with the MCSM (Monoprofile Medical Simulation Center) for the purposes of educating PSW nursing students and educating PSW staff, in partnership with the largest healthcare provider in the Pomeranian region - Copernicus

...and many, many others.

Pictures of the Medical Simulation Center

### „Human Resources + Design” project.

Improving the competences of PSW teaching staff in the field of universal design.

The main objective of the project is to organize specialized training courses, workshops, as well as study visits preparing to conduct Universal Design classes.

Pilot classes of Universal Design, will be implemented by staff teaching staff trained as part of the project and will be based on the document entitled Modules of Universal Design classes within selected educational areas and will be implemented within the framework of the project in first- and second-level studies in the following majors:

- Economics,
- Emergency Medicine,
- Nursing - first and second degree studies,
- Midwifery.

Ongoing use of the acquired competencies will contribute to the consolidation of new skills and will translate into higher quality of didactics at PSW. Implementation of classes based on the developed model solutions will contribute to maintaining high standard of education at Powiślański University.

## The project Accessible and Barrier-Free Powiślański University

The aim of the project is to support organizational changes and to raise awareness and competence of the university staff - Powiślański University - in the field of disability through implementation of activities aimed at ensuring accessibility of the university in terms of communication, administered websites, IT tools, educational procedures in higher education, introduction of modifications to educational programs to ensure their accessibility for students with disabilities and activities in the field of architectural accessibility.

As part of the project, the following tasks will be implemented:

- Elimination of architectural barriers
- Eliminating communication barriers
- Improving the competences of university staff (administrative, management and teaching staff)
- Equipping teaching laboratories, adaptation of teaching materials to the needs of people with disabilities.

## Integrated University Project

Project activities are addressed to students of medical faculties (emergency medicine and nursing) and economics, who will receive dedicated support to improve their general, professional, linguistic, analytical and IT competencies within the competence enhancement module, and to acquire practical skills in the course of implementation of internship tasks within the internship program module.

Within the project we offer the opportunity to participate free of charge in courses implemented as a series of training courses on improving interpersonal skills.

The training will be complemented by interdisciplinary practical classes and additional classes organized with employers to better prepare graduates to enter the labor market, aimed at validating the acquired skills in practice.

## Project Pomeranian Cooperation Zone for Development of BPO

The aim of the project is to develop human resources for the business services sector (e.g. BPO, SSC, IT) by improving competences of students of the Powiślański University (practical profile studies)

Support in the project will be implemented, at each stage, in cooperation with employers from the Modern Business Services sector.

[psw.kwidzyn.edu.pl](http://psw.kwidzyn.edu.pl) -> Uczelnia -> Projekty Unijne!

[powislanska.edu.pl](http://powislanska.edu.pl) -> Uczelnia -> PSW -> Projekty Unijne

[www.powislanska.edu.pl](http://www.powislanska.edu.pl)

[www.psw.kwidzyn.edu.pl](http://www.psw.kwidzyn.edu.pl)

For years, Powiślański University has boasted numerous achievements in the main subject of activity - educating students for the needs of the labor market regionally and macro-regionally (appreciated by national institutions and organizations and international).

Since its inception, the university has received numerous awards, distinctions and nominations in international, national and local competitions. The university also has national accreditations: Ministry of Health, Ministry of Education and Science - these are required and standard accreditations. However, our University, taking care of its continuous development, and above all constantly improving the quality of education has also obtained additional industry accreditations: among others, in the field of Nursing - studies with a future.

Among the national awards, definitely important and prestigious include the recently received: **Symbol 2021 in the quality of education** (Rzeczpospolita/Dziennik Gazety Prawnej); **Highest Quality International 2021 (15th edition)** in the field of quality of education; School for a medal; 1st place in the Perspektywa ranking in Pomorskie voivodeship in the category of non-public universities; nominations: **AMBASADOR INNOVATION 2021** for contributions to the development of innovation in Poland, pioneering projects, new ideas and unusual solutions (European Center for Economic Development);

**Polish Innovation Award 2021** (Polish Agency for Entrepreneurship); **Polish Intelligent Development Award 2021** in the Intelligent Development of Education category (Center for Intelligent Development).

For year 2022 Powiślański University has been awarded the title: The Higher Education Institution 2022!!! The title is a confirmation of meeting the highest standards in the educational market and appreciation of the University's activities to date. Potential capabilities of the University, technological innovation, highly qualified staff, as well as appropriate management have significantly contributed to this success.

Among the decisive successes of our University is also the admission of to **ASPHER - the association of schools of public health in the european region.**

The greatest success in this field are the dozens of recommendations for graduates of the University from employers, which year after year come to the University from all over Pomerania, but also neighboring provinces, for example: <https://psw.kwidzyn.edu.pl/pielęgniarstwo>.

Powiślański Monoprofile Center for Medical Simulation (PMCSM) was established to implement the highest standards of education in accordance with current guidelines and trends in medical education.

Pomerania's state-of-the-art training room facilities and top-quality equipment for training in simulated conditions are the hallmark of PMCSM.

The didactic classes implemented at PMCSM maintain the fidelity of medical simulation, and this ensures that learners will be placed in conditions of physical and emotional realism, allowing them to experience actions in conditions close to reality.

The learning process is supported by a simulation manual with simulation scenarios along with a video supplement available with an application to support simulation teaching.

Medical simulation is a rapidly growing field of education that makes it possible to realistically recreate the treatment and nursing process in a safe environment for the patient and student environment. Simulation is a training and feedback-based method - the student practices in conditions that are close to natural, and the correctness of his actions is controlled by both the instructor and the computer system.

The premise of medical simulation is to motivate the participant to take an active part in the learning process, enabling him to acquire the knowledge and psychomotor skills necessary to work with patients. In addition, simulation serves to develop creativity, critical thinking, decision-making, communication and implements the student to work as a team.

The Powiślański Monoprofile Medical Simulation Center has:

- Nursing care room - high fidelity
- Control room for the nursing care room
- OSCE exam room
- ALS simulation room
- BLS simulation room
- Nursing skills practice room
- Technical skills practice room
- A room for prebriefing and debriefing

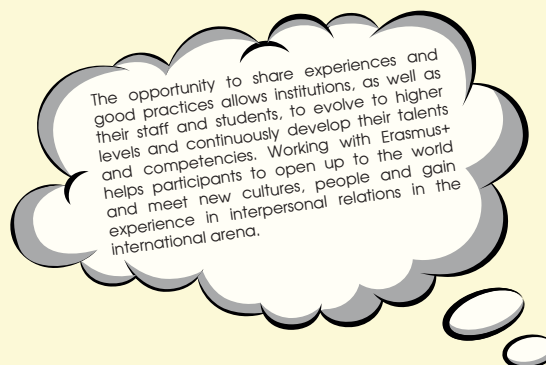

The rules of admission to the chosen field of study at Powiślański University is regulated by a resolution of the Senate. Recruitment for studies at the Powiślański University takes place by way of enrollment in the list of students.

In accordance with the resolution of the Senate, all persons who are Polish citizens or who are not Polish citizens and have a secondary school leaving certificate are entitled to apply for admission. The offer is directed mainly to graduates of secondary schools, as well as to those who want to gain new skills and qualifications, which enable them to retrain or even change their current profession.

Powiślański University conducts online recruitment via the Virtual Dean's Office student service system. The on-line recruitment covers all current fields of study, in which the education is conducted by Powiślański University. The candidate using the on-line recruitment receives an individual account and follows the instructions on the website [www.psw.kwidzyn.edu.pl](http://www.psw.kwidzyn.edu.pl). You are cordially invited, we are waiting for you!

[powislanska.edu.pl](http://powislanska.edu.pl) -> Kandydat -> Rekrutacja internetowa

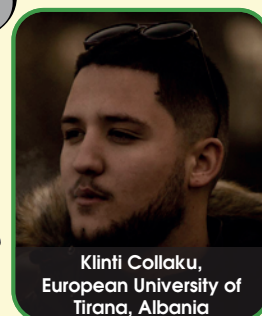

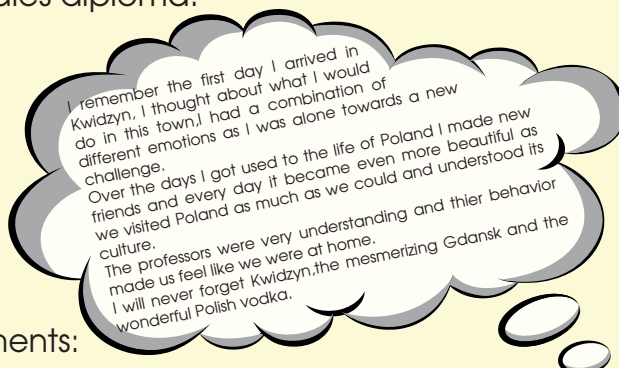

**Serdecznie zapraszamy, czekamy na Państwa!**

The education at the Powiślański University can be undertaken by any person with secondary education, documented by the secondary school leaving certificate in case of the first degree studies or, in case of the second degree studies, with higher education documented by the first degree studies diploma.

**1** Register online at our website  
[www.psw.kwidzyn.edu.pl](http://www.psw.kwidzyn.edu.pl)  
and complete the application.

**2** Complete the required documents:

## Bachelor degree:

- personal questionnaire (paper printout from WD system with legible handwritten signature),
- statement of current health insurance (paper printout from WD system with legible handwritten signature),
- secondary school certificate (document uploaded to the WD in the form of a scan from an original document saved in PDF format with a title: first name and surname).

## Master degree:

- personal questionnaire (paper printout from WD system bearing legible handwritten signature),
- statement of current health insurance (paper printout from WD system with legible own signature),
- diploma and diploma supplement (documents uploaded to the WD in the form of a scan of the original document, saved in PDF format, with the title: first name and surname).
